WE ARE PEONY ENTHUSIASTS

Some Say Specialists or Experts

OUR plantings of Peonies embrace over 975 varieties, from which we select the varieties here offered, everyone of which has decided merit. You might say these Peonies are the cream.

The six points of excellence we demand in a Peony are, in their respective order, as follows: Time of blooming; sure, free bloomer; color; size and form; strong stem; fragrance.

The demand for fine Peonies is growing with each year, and every florist should have at least a small plantation of them from which to supply his trade, both for the plants and for cutting the bloom. One can make no more profitable investment. The bloom if cut in the bud state lasts for a week or more.

We offer as choice a list of Peonies as you will find in this country. To the collector, the varieties named will be attractive. To those who wish to increase their stock of desirable sorts, this list will appeal, and to the nurserymen and dealers who buy to sell, there will be found a list of choice varieties at moderate cost.

We started some twenty years ago to grow Peonies, and we believe that no firm in this country has such a large planting of valuable sorts.

Our planting is close to a million roots, occupying sixty acres of land, many of them being two and three-year-old plants.

Our endeavor is always to lead and not follow in any branch of the floral business we undertake. We will make Good & Reese Peonies as much of a household word as are G. & R. Roses, so do not forget us when in need of Peonies. We can supply them (referring to the price) from the plebeian to the aristocrat.

"PEONIES FOR PROFIT"

"PLANT PEONIES AND MAKE MONEY"

THERE is no more profitable plant grown for cut flowers than the Peony. Every florist may have a plantation of the roots, and as the years roll by, they grow in value, because the roots get larger and produce more bloom. One hundred dollars' worth of Peony flowers have been cut from the back part of a city lot at Decoration Day, and the parties did not know much about cut flowers either.

We are selling Peony roots to many persons who are planting them for cut flowers in acre four-acre and as high as ten-acre plantings. You had better investigate this phase of the Peony question.

"PLANT PEONIES AND MAKE MONEY"

"PEONIES FOR PROFIT"

If you wish to grow Peonies for cut-flower planting: Plant 3 feet apart in rows, set rows 4 feet apart. It requires 3,630 plants to the acre for this distance planting.

OUR GUARANTEE

We guarantee our Peonies true to name.

Should error occur, we will replace with true stock or refund amount paid. There is one fact about Peonies that should be brought forcibly to the attention of all purchasers of Peony roots. That is, it takes fully three years from the time the root is planted before the Peony becomes adequately established to enable it to produce normal flowers. We do not pretend to come to final conclusions regarding them until they have bloomed the third year from planting.

HERBACEOUS PEONIES

The peony is a noble flower, rivaling the Rose in brilliancy of color and perfection of bloom. Indeed, when the Peony holds the boards, the "Rose Queen" is at least partially eclipsed. Nothing takes the place of the Peony for June weddings, receptions, school commencement, etc. In fact, there is no known flower that is so gorgeous in their blooming period. For large, showy bouquets or for vase or basket decorations in the house the Peony holds full sway and exacts complete homage from all flower lovers while she is reigning in the garden.

PEONIES TO BLOOM FOR DECORATION DAY

We are often asked for a list of varieties that will bloom for the 30th of May. In the latitude of Springfield, the following are usually blooming at that date: **Edulis Superba, Madame Calot, Festiva Maxima and Monsieur Jules Elie.** South of here, about the Ohio river line, all the varieties marked early and early midseason and midseason (see "Peonies for Pleasure"), will bloom for this occasion.

REMEMBER, FOR A FULLER DESCRIPTION OF THESE PEONIES, SEE OUR BOOK, "PEONIES FOR PLEASURE," MAILED ON APPLICATION.

"PEONIES FOR PLEASURE"

WE HAVE just issued a book on the Peony for the amateur with the above title. It gives information on Peony history. It gives a list of over three hundred of the very best varieties in commerce with a fuller description than this leaflet contains, telling how and when to plant Peonies for pleasure; gives information as to soil, as to fertilizers, and how to apply. How to cut and keep the flowers; how to grow exhibition bloom, and describes the most extensive planting of really valuable Peonies gathered together under the sun; describes the old and the new, as well as the plebeian and aristocrat of the Peony family. If you want information on the plant that stands next to the Rose in beauty, that is practically known to the amateur and to very many florists and nurserymen as simply a red, white and pink Peony, then send for "Peonies for Pleasure."

We Are Members of The American Peony Society.

SIZE OF ROOTS

We grade our roots as follows:

1st Size, Divided Roots—This is a root divided until it has from two to five eyes. This is the size we always plant and recommend this for general planting, both as to the desirability of its low cost and the results obtained.

2d Size, One-Year Roots—This is a 1st size divided root of two to five eyes planted and grown for one year, then dug and sold you as it comes from the ground, or its equivalent.

3d Size, Two-Year Roots—This is the 2d size left in the ground one year longer and sold you as it comes from the soil, or its equivalent.

4th Size, Three-Year Roots—This is the 3d size left in the ground one year longer and sold you as it comes from the soil, or its equivalent.

What we mean by its equivalent is, that we do not divide all our Peonies every year, hence could not have all the sizes every year. To illustrate: if we divided up all our *Modele de Perfection*, fall, 1916, for fall, 1919, we would have to divide up plants to get one-year and also two-year plants, but we give the equivalent in roots as though they had been so planted. **We always give value.**

|-----|--|-------|--------|---------|----------|
| 534 | BEN FRANKLIN —Rose type; early midseason. A brilliant crimson with ruby shadings at base of petals. Very tall erect stems, carrying individual blossoms in great profusion. Fragrance slight but agreeable. The flowers unfold slowly and carry their form and color much longer than most red varieties. It is a charmer and will give satisfaction. | 1.00 | 10.00 | | |

|-----|---|-------|-------|---------|----------|
| 587 | DOCTOR EDGAR PLEAS —(Pleas, 1900.) Anemone type. This is one of the most beautiful and wonderful productions without pollen or seed follicles such as man alone could have created and one of the most delicately charming of its type. Guards light lilac-pink; center of flower canary-yellow. When the bloom has obtained its full strength of stem and heritage of beauty the petaloid filaments in the center put on the airs of nobility by donning snow-white plumes midway over the bright yellow surface, being of greater width than on the recurved filaments themselves, each plume being cupped and curved like the white caps on the waves of the ocean—as if it were on dress parade. Mrs. Pleas says in regard to the yellow ones: "I think the Dr. Pleas best, else I had not named it that." Certainly unique. | 6.00 | 60.00 | | |
| 41 | DUCHESSE DE NEMOURS —(Calot, 1856.) Blooms several days after Festiva Maxima. Cup-shaped, sulphur white blooms. Fine for cut flowers. | | 2.50 | 20.00 | 175.00 |

| 94 | ELIE CHEVALIER —(Dessert, 1908.) Opens a large, globular bomb, developing into a high-built crown, forming a cup of beautiful imbricated petals. Color a uniform Tyrian-rose, center elegantly flecked with crimson. Tall grower; free bloomer; fragrant. | 1.75 | 17.50 | | |

| 539 | ELLA WHEELER WILCOX —(Brand, 1907.) Bomb type; late. Prize Peony. Markedly bomb shaped, but with interesting variations in details. Deep shell-pink. The elevated cup shaped center which is enclosed by a row of irregular fringed petals is surrounded by many rows of irregular fringed petals, the outer ones sometimes becoming a rich cream. Around the central mass are many rows of fringed petals becoming reflexed. Unusual in its form and varied coloring. Good cut flower. Very fragrant. Distinct. | 1.00 | 10.00 | | |
